

NAHB Education

The Master Certified Green Professional (Master CGP) Designation Courses are Coming!

Advanced CGP: Building Science

March 8 & 9, 2012

Times: 8 a.m. – Registration/Light Breakfast
8:30 a.m. to 5 p.m. – Training
(Lunch included both days)

Place: **HBA Office**
(10104 Old Olive Street Road, 63141)

Cost: **\$255** – Green Bldg. Council Mbrs.
\$275 – HBA Members/Guests
\$355 – Non-Members

Details: This course covers building science techniques for constructing and remodeling high-performance homes. Students will use case studies, detailed construction drawings and other resources found on *GreenBuildingAdvisor.com* to create more durable, environmentally responsible and sustainable housing units. Graduates will be able to:

- Combine building physics with building performance
- Translate building science into elements of design & construction
- Incorporate high performance, energy efficiency, water efficiency, materials efficiency & indoor environmental quality standards into every housing unit
- Describe a high-performance home & its benefits to their team & their clients
- Use all aspects of GreenBuildingAdvisor.com (laptops in class are encouraged)

Advanced CGP: Project Management

March 29 & 30, 2012

Times: 8 a.m. – Registration/Light Breakfast
8:30 a.m. to 5 p.m. – Training
(Lunch included both days)

Place: **HBA Office**
(10104 Old Olive Street Road, 63141)

Cost: **\$235** – HBA Council Members
\$255 – HBA members
\$335 – Non-members

Details: This course teaches builders and remodelers to integrate green building tasks and the green home certification process into their project management routine to create an effective, streamlined process. Using the whole-house approach, this course identifies important documents and methods of communication in order to clarify who does what and when. Graduates will be able to:

- Integrate green tasks into project management for a collaborative & more efficient approach toward meeting various green standards
- Develop an understanding of the fundamental principles of the National Green Building Standard™
- Discuss ways to limit potential green building liabilities & increase the project's bottom line using streamlined management practices
- Improve marketing strategies for selling green

To Register for Either Course: Please make separate reservations at www.stlhba.com/events **no later than** Friday, February 17, 2012. **NOTE:** We must have at least 10 students enrolled in each class by the date noted above to follow-through with these offerings. Cancellations for either course must be made 10 business days in advance. A cancellation fee of \$25 per course will apply after Friday, February 17 (substitutions permitted). No-shows will be responsible for entire payment. Completion paperwork will be withheld until all payments are received. Non-Members must pay in advance (upon reservation).

Take Both Classes – Earn the Master CGP Designation! Any student that completes both of these classes will be eligible to earn the **Master Certified Green Professional (CGP)** designation from NAHB! To find our more about NAHB designations and related fees, go to www.nahb.org/designations.

About the Instructor: **Matt Belcher, CGP** is a nationally recognized green builder. His popularity as a speaker and trainer for the residential construction industry continues to grow. He owns Belcher Homes in St. Louis, MO and is the author of, *"Build Green and Save: Protecting the Earth and Your Bottom Line"* published by NAHB. He's a past president of the St. Louis HBA and has served on many HBA committees through the years. He continues to serve as the chair of the St. Louis HBA's Green Building Council and also serves on the NAHB Green Building Sub-Committee of the National Codes Committee.
