Help Habitat Build Six Homes By June

General Construction Volunteer

Do you know what a hammer is? Do you want to learn more about construction? This is the opportunity for YOU! These volunteers get to swing hammers, paint, landscape and do do all the "fun stuff" with a time commitment of the day(s) you sign up for the build(s). This opportunity is for the volunteer with a skill level of beginner to expert in construction.

Volunteer Construction Site Coach

Are you one of those people that knows what it takes to build a home and would like to guide others in the process? This is the opportunity for YOU! This opportunity requires more time commitment and more knowledge of the construction trade than General Construction Volunteers. Volunteer Construction Site Supervisors must be willing to assist fellow volunteers with learning how to accomplish construction projects.

Group Volunteers

Are you a part of a church community group, have a job that requires group volunteering, or simply have a group of friends that want to help build a home? This is the opportunity for YOU! Habitat for Humanity can accept volunteer group sizes of 5 people - 25 people. What a great way to bring your group closer together while bringing a house from a Dream to a Reality!

Habitat for Humanity Advocate

Would you rather not be on site swinging a hammer or painting, but still want to be involved in building a home? This is the opportunity for YOU! Advocating for Habitat for Humanity has many different possibilities: donating/cooking food for volunteer groups, host site supervising, assisting in finding construction volunteers, and many other options.

**Only 1000
Volunteer Spots
Available**
